

## Robot ages

Four robots are for sale at the market. Each of them was built in a different year. Can you figure out how old they are?

1. The age of the robot with four arms is an odd number.
2. The robot with two legs is two years younger than the yellow robot.
3. The robot with the antenna on its head was built five years ago.
4. The yellow robot has ten fingers and is either 2 or 4 years old.
