

Pets

Four children in the neighborhood – Hillary, Kevin, Liam and Dean – are good friends, and each of them has a different pet: a fish, a dog, a cat or a parrot. Can you figure out which pet belongs to each child?

1. One of the boys has a dog, but it is not Dean.
2. Hillary has a pet with legs.
3. Dean has neither a cat nor a fish.
4. Kevin has either the dog or the parrot.
