

## Who Lives Where?

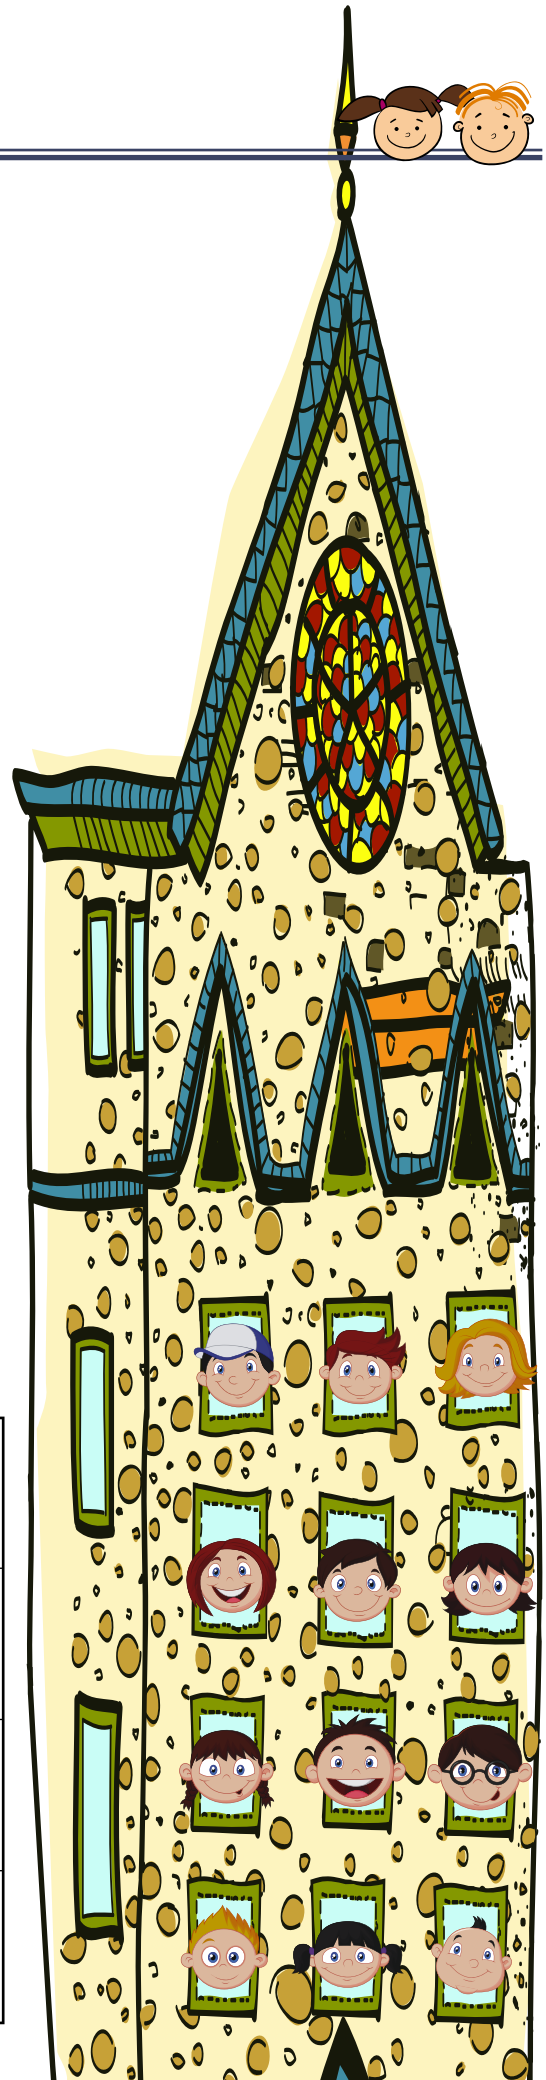

Twelve children live in this apartment building — five girls and seven boys.

They are all looking out of their windows right now. But who is who, and where does each child live?

Can you figure it out by comparing the clues with the table and the picture?

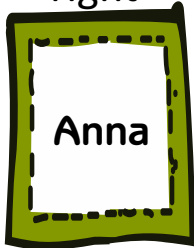

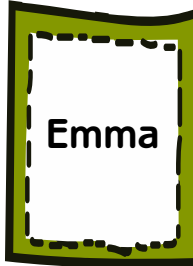

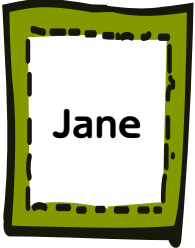

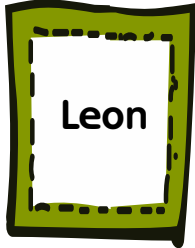

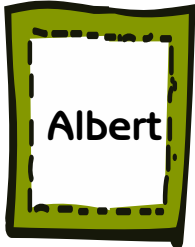

1. Martin lives between two girls.
2. Mark lives on the ground floor and has blond hair like Anna.
3. Sophie lives below Leon and to the right of Mark.
4. Tina lives below a boy and above Jane.
5. Frank lives to the left of Derek and above a girl.
6. Emma lives above Albert.
7. Peter lives on the right side of the building.
