

Cat Show

Seven cats – Bo, Duke, Fifi, Lady, Princess, Rover, and Spoke – were resting in their baskets at a cat show. But during the night, the caretaker forgot to lock the doors, and all the cats wandered out.

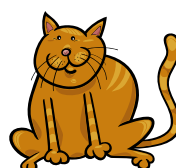

The next morning, the caretaker tried to put them back in their baskets according to the order he remembered.

Can you figure out how he arranged the cats?

1. Spoke does not like other cats, so she is at the very end.
2. Princess is somewhere to the left of Bo.
3. Duke is between Lady and Rover.
4. Rover is the third cat from the right.
5. Only Princess is between Fifi and Lady.
6. Duke is directly to the right of Lady.
