

The New Neighbors

Hazel recently started college and moved into Apartment 2B in Building No. 14 on Berger Street. On her very first day, one of her neighbors told her all about the people living in the building – so quickly and all in one breath that Hazel could hardly remember everything.

This is what the neighbor told her:

"I'm Amelia, and I live on the third floor below the young musician named Mr. Goodwin, who likes the young model Mrs. Lee from the first floor. Next to her lives Mr. Payne, an engineer who works in the same pear factory where his uncle, Mr. Reeves, used to work. Mr. Reeves is the oldest person in the building and lives below Mrs. King, a singer whose songs are always being complained about by Mrs. Hunter, who lives above her and likes Mr. Claus, a veterinarian living next door. Mr. Claus often works in the animal protection club with a medical student named Webb, who lives below me, and the club is managed by Mr. Forster, who lives next to me."

Can you write the correct apartment number next to each last name and figure out Amelia's last name?
