

The Cats

Six cats in a competition were standing on the stage in front of the judges, but the order of their numbers got mixed up.

Can you figure out which cat is first and which cat is last in the line?

1. Cat number 3 is standing between cat number 1 and cat number 2.
2. Cat number 4 is sitting next to cat number 5, but not next to cat number 1.
3. There are three cats between cat number 5 and cat number 6.
4. Cat number 6 is not standing in the first position.
5. Cat number 1 is not sitting next to cat number 6.
6. There are two cats between cat number 4 and cat number 3.

The Cats

The first cat: number 4, the last cat: number 6
