Template with clock face and hands

You will need:
- Thick printer paper
- Scissors and glue
- A paper fastener

1. Print the template onto thick paper.
2. Carefully cut out the clock hands and the clock face.
3. Position the hands on the clock face so that the dots align perfectly, then push a paper fastener through the hands and the clock face.
4. Spread the prongs of the fastener apart just enough to hold the hands securely in place while still allowing them to rotate.
