Addition and subtraction within 20

For every addition problem, you can create a corresponding subtraction problem. This is called an inverse operation.

Solve the problem and form the inverse operation.

5	+	7	=	12	⟹	12	-	7	=		
9	+	6	=		⟹		-		=		
4	+	8	=		⟹		-		=		
2	+	12	=		⟹		-		=		
8	+	8	=		⟹		-		=		
11	+	7	=		⟹		-		=

Solutions

Addition and subtraction within 20

For every addition problem, you can create a corresponding subtraction problem. This is called an inverse operation.

Solve the problem and form the inverse operation.

$5 + 7 = 12 \Rightarrow 12 - 7 = 5$

$9 + 6 = 15 \Rightarrow 15 - 6 = 9$

$4 + 8 = 12 \Rightarrow 12 - 8 = 4$

$2 + 12 = 14 \Rightarrow 14 - 12 = 2$

$8 + 8 = 16 \Rightarrow 16 - 8 = 8$

$11 + 7 = 18 \Rightarrow 18 - 7 = 11$
